SKYPE FOR BUSINESS ON YOUR TERMS

With over 15 years' experience in IP Telephony and Collaboration technologies, Cisilion ensure you can get the most out of Lync or Skype for Business

As with previous versions of Lync, Skype for Business doesn't have to be a rip and replace. As a Tier 1 Microsoft Gold Communications Partner, Cisilion can provide all your Skype for Business design, consultancy and integration requirements.

Lync and Skype are already everywhere:

300 MILLION

people use Skype

70% OF FORTUNE
500 COMPANIES

already use Lync in some
capacity

3 WAYS TO DEPLOY

rip, replace or integrate

\$500 PER USER

an average Skype for Business
return over 3 years

Interoperability
into your
existing video
end points**

WHY CISILION?

We hold the highest level of accreditations with both Microsoft and Cisco

Cisilion are uniquely placed to provide outcome-based and impartial advice to ensure the solutions we deliver enable you to achieve your objectives.

Microsoft Partner
Gold Communications

Cisilion have over 15 years of expertise in IP telephony and collaboration solutions

Cisilion have over 15 years of expertise in IP telephony and collaboration solutions, in designing, deploying and supporting operating global solutions. We understand that every environment is different and that you have investments in different vendors and architectures. Our team of consultants are specialists in their fields, certified and trained across the leading IP Telephony eco-system partners.

We are trusted by over 150 organisations

We are trusted by over 150 organisations to protect their infrastructure and intellectual property globally. Our business consultants and technical experts design and implement your solution and manage risk. They embrace the mobile and social cloud technologies whilst ensuring continuous control and visibility.

EXPERIENCE

We are trusted by our global customers to design, manage, implement and support their Microsoft Lync and S4B environments including green-field implementations, migrations and integration into existing PBXs. We work on premise, in the cloud (Office 365) and in hybrid deployments.
